DO IT
WITH
DIAPERS

- 1 out of 4 babies are born into poverty right here in Kent County.
- WIC and food stamps do NOT cover the cost of diapers.
- An adequate supply of diapers can cost more than \$75 a month.
- Many babies are forced to spend the entire day or longer in a single diaper because the family doesn't have an adequate supply of diapers.
- Inadequate diaper changing increases the risk of numerous developmental and health issues.
- Studies show that a baby crying from being in a soiled diaper for a prolonged amount of time is at greater risk of being physically abused by their caregiver.
